

What size is my problem?

Football players face lots of problems on the pitch. However, the size of the problem can be big, medium and small. For example, if a Team is winning 5-0 then the opposing team scoring a goal is less of a problem than if it was 1-1 and a penalty was given right at the last minute.

What is bothering you right now?

Can you decide if it is a big, medium or small problem?
