# Categorising Organisers

Revision help

A way of categorising information to help revision. The frame makes the information visual and helps with organisation. Many people with autism learn content better when it is presented visually. It also helps with working memory.

A partially started organiser to prompt the learner

A completed sample of work by a pupil using pictures to help working memory and also using their favourite animals to make it personal to them

What is the definition of a vertebrate?

A vertebrate is an animal with a backbone.

Another example

First match up the pictures and sentences. Next add in your own sentence about each one. **Please send me a screenshot of it.**

Matter

Solids

Liquids

Gases

Has a fixed shape

Particles are arranged in rows and cannot move

Takes the shape of the container

Particles can change places to make it flow

Fills all space

Particles move very fast
